Professional Summary

Software Engineer with 6 months of internship experience in Full-Stack Development, Machine Learning, and Data Analytics. Proficient in Python, JavaScript, React.js, Node.js, Django, REST APIs, SQL, and AWS, with hands-on experience building scalable applications, optimizing API performance, and developing AI-driven solutions. Demonstrated ability to improve system reliability, enhance application performance, and contribute to data-driven software development.

Certifications

AWS Cloud Practitioner Essentials (Amazon) ↗ | Introduction to AI (Google) ↗ | Data Analytics (Google) ↗ | Foundations of AI & Machine Learning (Microsoft) ↗ | Generative AI (IBM) ↗ | SQL Foundation (Microsoft) ↗

Technical Skills

- **Languages:** Python, Java, C++
- **Frontend:** React.js, Next.js, HTML, CSS, JavaScript, Bootstrap
- **Backend:** Node.js, Express.js, Django, FastAPI, REST APIs
- **Databases, Cloud & DevOps:** MongoDB, PostgreSQL, MySQL, AWS, Docker, Git, CI/CD
- **AI/ML & Data Analytics:** Machine Learning, NLP, LLM, Artificial Intelligence, Gen AI, Power BI

Experience

Software Engineering Intern(Full Stack Developer) | Instahyre Feb 2026 – Apr 2026

- Resolved **production issues** in REST APIs, backend validation, and data pipelines through systematic debugging, improving system reliability by **30%** and ensuring stable operations.
- Developed **scalable full-stack features** using Django, Python, and JavaScript, reducing API latency by **20%** and enhancing overall application performance.
- Enhanced backend systems for **high-concurrency environments** supporting **10K+ requests/day** and collaborated in Agile teams to accelerate deployments.

Software Engineering Intern | Indian Oil Corporation Ltd.

Nov 2025 – Feb 2026

- Designed a **machine learning-based fuel demand forecasting system**, improving prediction accuracy by **15%** through advanced model selection and feature engineering.
- Analyzed **10K+ records** using data preprocessing, feature engineering, and EDA to extract actionable insights and support data-driven decision-making.
- Implemented **regression and ensemble models**, boosting model performance by **20%** using cross-validation and hyperparameter tuning.

Projects

GesturEase | C++, OpenCV, Machine Learning

- Built a **real-time gesture recognition system** achieving **95% accuracy** using computer vision and **advanced image processing pipelines** for robust real-world performance.
- Enhanced accessibility by **40%** for elderly and Parkinson's patients through user-centric design.
- Streamlined the gesture detection pipeline to enhance system responsiveness, reducing latency by **25%** and improving user experience.

Beatwell-AI | Python, TensorFlow, Node.js, MySQL

- Created and deployed machine learning models for heart disease prediction achieving **94% accuracy**.
- Boosted model **F1-score by 30%** through advanced preprocessing and feature optimization.
- Architected scalable backend systems supporting **1,000+ users** with improved response time.

Education

VIT Bhopal University | B.Tech CSE (AI/ML)

Jul 2022 – May 2026

- CGPA: **9.03/10**

Extra-Curricular Activities & Achievements

- Secured a podium finish in Inter VIT Hackathon (AdVITya 24) by developing an innovative, scalable solution.
- Advanced to Round 2 of Adobe India Hackathon 2025 by building a scalable and efficient software solution.
- Ranked Top 150/1000+ teams in GeeksforGeeks & Vultr national hackathon.
- 1st Place: AARAMBH Basketball Championship 2023; Runner-up: Advitya Basketball Tournament 2024.
